EndNote چیست؟

این نرم افزار، پایگاهی جهت ذخیره و سازماندهی منابع مورد استفاده در نوشتن مقالات، پایان نامه ها و کتابها

اصطلاحات رایج در EndNote

- ▶ مستندات یا Citation، که به منابع استناد شده در متن مقاله گفته می‌شود.
- ▶ فهرست منابع یا Bibliography، که در پایان متن پژوهشی یا مقاله ذکر می‌شود.
- ▶ سبک یا Style، که مجلات مختلف برای نوشتن منابع از آنها استفاده می‌کنند.

استفاده از نرم افزار ENDNOT

چنانچه براي اولین بار از این برنامه استفاده می‌کنید پنجره زیر برای شما نمایش داده می‌شود.

با انتخاب گزینه دوم می‌توانید یک Library جدید بسازید

در صورت داشتن Library قبلی، گزینه سوم را انتخاب نمایید.

استفاده از نرم افزار ENDNOT

بعد از انتخاب گزینه دوم، در پنجره باز شده، نام و محل ذخیره شدن Library خود را انتخاب نموده و بر روی دکمه SAVE کلیک کنید.

شما همچنین می‌توانید برای ایجاد Library جدید از منوی File/ New واقع در نوار ابزار بالای برنامه EndNote هم استفاده نمایید.

How To create new library?

Social Determinants of Health and Mental Health Among Asian Americans in the United States

Jick Kim
University at Buffalo, The State University of New York
Jian Chen
Hong Kong Polytechnic University
Michael S. Spencer
University of Michigan

Although Asian Americans are one of the fastest growing ethnic minority groups in the United States, research on this population continues to lag behind that on other minorities. In this article, we take factors recognized as critical elements to the physical and mental health outcomes of Asian Americans and apply the social determinants of health (SDH) framework to reconceptualize these factors as structural or intermediary factors. This study uses a nationally representative sample of Asian Americans from the National Latino and Asian American Study (N = 2,667) to examine the relationships between the SDH factors and 4 physical and mental health outcomes (chronic conditions, diagnosable mental health disorders, self-rated physical health, self-rated mental health). Negative binomial, logistic, and ordinary least squares regression analyses are needed to estimate these associations. The results show that structural and intermediary factors are significantly associated with all 4 health outcomes. The associations vary by outcome measure, generational status, and ethnic background. Findings indicate that structural factors, such as ethnicity, poverty, and generational status are not trivial to Asian Americans' physical and mental health. Understanding the impact of intermediary factors, including socioeconomic status, discrimination, and English-language proficiency, from the context of the Asian American experience can be helpful in dispelling the "model minority" stereotype that remains prevalent.

Key words: Asian American, social determinants of health, poverty, discrimination, English-language proficiency, generational status

Asian Americans are one of the fastest growing ethnic minority groups in the United States. An estimated 14.6 million Asian Americans lived in the United States in 2010, and this number is projected to double by 2050, increasing the Asian American population to more than 40 million persons or roughly 18% of the projected total U.S. population (U.S. Census Bureau, 2011). Thus, developing a better understanding of the Asian American experience is needed to ensure the well-being of this population.

The social determinants of health (SDH) framework, derived from the work of the Commission on Social Determinants of Health (CSDH), posits that the circumstances in which individuals are born, grow, live, work, and age largely determine their health status (CSDH, 2008). Common SDH factors include age, gender, education, and income or wealth (Diderichsen, Egerter, & Williams, 2011). For social and ethnic minorities in the United States, and given additional SDH factors, such as ethnicity, generational status, poverty, discrimination, and English-language proficiency might enhance the ability to explain and understand their physical and mental health outcomes.

In the present study, we use the SDH framework to understand the contributions of selected SDH factors to general physical and mental health outcomes among Asian Americans.

Social Determinants of Health Disparities

Based on Diderichsen's (2004) model of the health impact of social position and social context, the SDH framework puts special emphasis on the social stratification process. Social stratification emerges as a consequence of particularly biased social and economic policies that favor a majority group holding power. As a result, social stratification puts those with less power and fewer resources at risk for differential exposure and vulnerability to health and mental health problems, as well as the consequences of these problems (Datta, Lewis, & CSDH, 2007). For example, research has well documented that ethnic minority status and lower socioeconomic status contribute to worse health outcomes in the United States (Diderichsen, An, Williams, & Egerter, 2008).

The SDH framework consists of three core components: (a) socioeconomic and political context; (b) structural determinants of health and socioeconomic position; and (c) social or intermediary determinants of health (Nohr et al., 2007). This study examined the structural and intermediary determinants of health.

Structural determinants of health refer to factors that generate stratification and divisions by social class in society, such as income, education, occupation, gender, and racial/ethnicity. Structural determinants operate through a series of social or intermediary determinants, which are individual-level factors that influence physical and mental health outcomes. Examples of intermediary determinants include material circumstances (e.g., housing and neighborhood environment), psychosocial stressors (e.g., negative life events, extent of social support, coping styles), behavioral and biological factors (e.g., exercise, diet, drinking, smoking), and the health system (e.g., access to health care).

The SDH framework provides several advantages in conducting social work research. One advantage is that the SDH framework is grounded in the "theory of social power" that clarifies social stratification dynamics. Under this premise, researchers can more fully connect important emerging factors to social context. Another advantage of the SDH framework is its provision of language to explain the relation of various factors at different levels (i.e., individual, community, and societal). In short, the SDH framework allows social workers and other researchers to not only examine various structural, social, and intermediary factors that affect health outcomes but also to use these findings to advocate for change in social and economic policies that impact our countries.

Americans who are either naturalized citizens or U.S.-born (Luman, 2004).

In general, higher SES, measured as income or education, predicts better physical and mental health outcomes (Pappas, Queen, Hadden, & Fisher, 1993). However, growing evidence suggests that some first-generation immigrants might fare better in terms of their physical and mental health status when compared with their native U.S.-born counterparts (Takeuchi et al., 2007). Traditional measures of SES such as income and education might not adequately explain the ways in which social disparities influence health outcomes among Asian immigrants (Jin, Castro, Gao, & Takeuchi, 2010). Therefore, considering nativity or generational status of Asian immigrants as an SDH element can enhance our understanding of the effect of nativity on physical and mental health. Further, ethnic background influences physical and mental health outcomes among Asian Americans (Jin & Kessler, 2010; Uehara, Takeuchi, & Smedley, 1994), and therefore, should be included in discussions of SDH.

Intermediary or Social Factors

Intermediary or social factors contribute to potential differences in exposure and vulnerability to conditions that compromise individual health conditions (Sklar et al., 2007). Within a given society, social gradients exist that reflect a group's position in society

نحوه ورود منابع از طریق EndNote به Word

► برای وارد کردن منابع به Word، ابتدا باید مقاله یا پایان نامه نوشته شده خود را باز نمایید

► مکان نما را درجایی قرار دهید که منبع باید ذکر شود، مثلاً در پایان جمله یا پاراگراف.

نحوه ورود منابع از طریق EndNote به Word

The screenshot displays the EndNote X6 interface. The left sidebar shows the 'My Library' section with 'All References' (193), 'Unfiled' (193), and 'Trash' (770). Below this is 'My Groups' and 'Online Search' options like 'Library of Congress', 'LISTA (EBSCO)', 'PubMed (NLM)', and 'Web of Science (TS)'. The main window features a search bar with 'visfatin' entered, and a table of search results. The table has columns for Author, Year, Title, Rating, and Journal. Several entries are highlighted with green boxes, including those by Adya, R.; Tan, B. (2008), Alba, A.; Puertas, ... (2004), Aldhahi, W.; Ham... (2003), Amos, A. F.; McC... (1997), Antuna-Puente, ... (2008), Arner, P. (2005), Arnush, M.; Heit... (1998), Arya, R.; Blanger... (2002), Atkinson, M. A.; ... (1994), Bailey, S. D.; Lore... (2006), Bastard, J. P.; Ma... (2002), Beltowski, J. (2006), and Berndt, J.; Klotin... (2005). The status bar at the bottom indicates 'Showing 193 of 193 references.'

برنامه ورد برگردید

نحوه ورود منابع از طریق EndNote به Word

در برنامه Word، وارد تب EndNote شوید و مراحل زیر را دنبال نمایید تا منبع مورد نظر وارد متن شود.

Insert Citation/ Insert Selected Citation (s)

در قسمت Style، سبک‌های مختلفی وجود دارند که متناسب با مجله و یا پایان نامه خود باید آنها را انتخاب نمایید. البته این کار را در داخل برنامه EndNote هم می‌توانید انجام دهید ولی تا زمانی که سبک مورد نظر را در Word انتخاب نکنید، تغییرات اعمال نخواهند شد.

سال ۹۰ افت در انتشار کتاب دیده شد، این روند در انتشار
بیشترین تعداد مقالات منتشر شده توسط مراکز در سال ۸۸

در قرن حاضر، دیابت در سراسر دنیا شیوع یافته و پیش‌بینی می‌شود تا سال ۲۰۳۰ بالغ بر ۳۶۰ میلیون نفر در دنیا به دیابت مبتلا شوند. مقاومت انسولین و چاقی با دیابت نوع ۲ ارتباط تنگاتنگی دارند و جزء عوامل خطرزایی هستند که باعث پیشرفت این بیماری می‌شوند (Antuna-Puente, Feve, Fellahi, & Bastard, 2008)

Antuna-Puente, B., Feve, B., Fellahi, S., & Bastard, J. P. (2008). Adipokines: the missing link between insulin resistance and obesity. *Diabetes & metabolism*, 34(1), 2-11. doi: 10.1016/j.diabet.2007.09.004

At present, due to the growing knowledge(1) and increasing competition(1, 2) in it, evaluating scientific production using scientometrics methods has become very important and necessary. Scientometrics, in the simple sense,

Debackere	2004	Using a bibliometric approach to support research policy making: The case of the Flemish BOF-key
Franceschini	2011	Criticism on the hg-index
Ivancheva	2008	Scientometrics Today: A Methodological Overview
Molinari	2008	Mathematical aspects of a new criterion for ranking scientific institutions based on the h-index
Molinari	2008	Mathematical aspects of a new criterion for ranking scientific institutions based on the h-index
Molinari	2008	A new methodology for ranking scientific institutions
Molinari	2008	A new methodology for ranking scientific institutions
Van Raan	2006	Comparison of the Hirsch-index with standard bibliometric indicators and with peer judgment for 147 chemistry resear
Van Raan	2005	Fatal attraction: Conceptual and methodological problems in the ranking of universities by bibliometric methods

Change Reference Style

Create New Style

برای ایجاد Style جدید باید منوی **Edit** و سپس گزینه‌های **Output Style** و **New Style** را انتخاب نمایید. این کار به لحاظ زمانبر بودن و مشکلات همراه آن توصیه نمی‌شود و بهتر است که یکی از Style‌های موجود که با سبک مورد نظر مطابقت بیشتری دارد را انتخاب و ویرایش نمایید.

برای این کار از منوی **Edit**، **Output Style** مورد نظر خود را انتخاب و اقدام به ویرایش آن نمایید.

Create New Style

بخش‌های اصلی پنجره نشان داده شده در شکل قبل، Citations و Bibliography هستند که در این قسمت به تنظیمات مهم این دو بخش می‌پردازیم.

بسته به فرمت مجله، در قسمت Templates می‌توانید تعیین کنید که آیا مانند کادر آبی رنگ، شماره منابع در متن آورده شود یا اینکه مثل کادر قرمز به صورت مولف، سال وارد شود (گزینه پیش فرض سبک APA).

Create New Style

در قسمت Author Lists
می‌توانید تعیین کنید که بعد از
آوردن نام چند مولف کلمه
همکاران آورده شود.

Author Lists

Author Separators

Number of Authors: 1 to 100, between: , before last: &

100 to 100, between: , before last: &

Abbreviated Author List

☐ List all author names

☒ If 7 or more authors, list the first 6 author(s)

and abbreviate with: , et al. ☐ Italic

☐ If eight or more authors, list the first 6 authors, insert: and add the last author's name

For Subsequent Works by the Same Author

☒ Print the author list as defined above

☐ Omit the author list

☐ Replace repeated authors with: ---

Create New Style

در قسمت Sort Order می‌توانید تعیین کنید که فهرست منابع بر چه اساسی مرتب شوند.

گزینه اول به ترتیب ظهور در متن مرتب می‌کند و بقیه گزینه‌ها همانطور که تصویر مشاهده می‌کنید به وضوح مشخص شده است.

Remove Citations:

The screenshot shows the EndNote X6 software interface. The 'References' tab is active in the ribbon. A green arrow labeled '1' points to the 'Edit & Manage Citation(s)' button. Below the ribbon, the 'EndNote X6 Edit & Manage Citations' window is open. A green arrow labeled '2' points to the window's title bar. Inside the window, a table lists citations. A green arrow labeled '3' points to the 'Edit Reference' button in the right-hand column of the table. A context menu is open over this button, and a green arrow labeled '4' points to the 'Remove Citation' option.
